ABOUT ME

A motivated and detail-oriented Business Analyst with experience in business process analysis, project coordination, digital transformation, and technology-driven business solutions. I have hands-on experience working with CRM, HRM, project management, workflow automation, data collection, reporting, and website development projects, with a strong focus on identifying business requirements and converting them into practical solutions.

I am passionate about using technology to improve organizational efficiency, streamline business processes, and support data-driven decision-making. I also have experience contributing to digital marketing, social media management, content planning, and corporate branding initiatives. Alongside my professional experience, I have worked on an AI-based legal research project involving semantic search, document summarization, and data-driven analysis.

I am a fast learner, problem solver, and team-oriented professional who continuously seeks opportunities to develop my technical, analytical, and business skills while contributing meaningful value to an organization.

EXPERIENCE & LEADERSHIP

Business Analyst April 2026 - Present
Akand Engineering
Analyzing business processes and contributing to engineering solutions.

Director of Social Circle May 2024 - December 2025

Research | Cyber Security | Internet of Things (IoT) | Music

Projects, education & activities

MD Kazi Jawadul Islam | Curriculum Vitae

SELECTED PROJECTS

NEXORA - Multi-Business Operating Platform

React, TypeScript, Vite, Tailwind CSS

Frontend ERP prototype combining finance, inventory, procurement, HR, and governance for multiple businesses. Features entity-based access, approval workflows, intercompany transactions, and hash-chained audit records with browser-local demonstration data.

Missile Tracking & Security System

Arduino, ultrasonic and IR sensors, servos, keypad

Educational scale-model simulation combining ultrasonic object sensing and servo feedback with an independent keypad-controlled security subsystem. LEDs, buzzer feedback, and timed access states demonstrate sensing and control logic.

Interactive 3D Flipbook Product Catalogue

React, TypeScript, Vite, CSS 3D transforms

Customizable web catalogue with a book-like page-turn interface, searchable index, thumbnails, zoom, and fullscreen reading. Supports button, keyboard, and pointer navigation with configurable branding and page content.

Maison Velour - Immersive Fragrance Boutique

HTML, CSS, JavaScript, Three.js

Fragrance storefront prototype featuring a walkable 3D boutique, seven fragrance houses, a mini-map, and interactive bottle inspection. Includes a live gift builder and demo-bag reward tiers; checkout is not connected.

Hridita Huq - Fashion Portfolio

HTML, CSS, JavaScript, responsive design

Editorial fashion portfolio with an animated five-look runway, individual collection pages, seven interactive atelier studies, and a cinematic journal. Supports swipe, drag, keyboard navigation, and reduced motion.

3D Building Blueprint - Kazi Jawad

JavaScript, Three.js, parametric 3D visualization

Interactive building concept configurator with four framing systems, adjustable dimensions, live measurements, and exploded views. Exports a rendered PNG and downloadable design brief; intended for concept visualization, not structural calculation.

EDUCATION

B.Sc in Computing and Information System (CIS) 2022 - Present
Daffodil International University | Artificial Intelligence Major

HSC in Science Completed: 2021
Islamabad Collegiate College, Khulna | GPA: 5.00 / 5.00

SSC in Science Completed: 2018
BAF Shaheen School, Jashore | GPA: 4.89 / 5.00

CERTIFICATION & EXPOS

AWS Cloud Foundations | Destination Expo 2023 | Destination Expo 2024

ADDITIONAL ACTIVITIES

Fun with Code 2.0 - Participant (2023); Fun with Code - Participant (2022); The Unnamed (Band) - Bassist (2019 - 2022).
